

RV parking Reservation Information

RV sites are approximately 30' x 50' and includes 50amp electric plus 110. If your unit is longer than 50 you will need to either purchase two sites or find a friend that has a smaller unit and is willing to share their spot. You must send these in together and explain you need an end to end spot so you can share. If your tow car doesn't fit into your space, please move it to day parking.

WATER is available at the end of each row. All water is just for fill and not for continued hook up. This is a county rule and must be followed. You will need to bring extra hose with you and share with your neighbors to reach. Also bring extra electric cords with you as you are not always close to your outlets. There are no pump out facilities on the grounds. Pump outs will be available, cash only, on Thursday for \$35.00 The NSDTRC(USA) and Ocala Dog Park reserves the right to assign all parking. All campers are asked to observe QUIET HOURS in the evenings. A camping unit includes one motor home and a vehicle in tow or tow vehicle and trailer.
